

## Mast Raising Line Order Form

Company Name \_\_\_\_\_

Rig # \_\_\_\_\_

Qty	Rope Diameter	Assembly Length	Wire Rope Construction	Socket A	Socket B	Dimension A	Dimension B	Pins

- Please note ' factory new or ' customer used sockets.
- Most rigs have two pieces, one longer than the other.
- Generally one piece has a closed socket on one end and an open socket on the other end.
- The other piece has an open socket on each end.
- Some rigs have as many as four pieces.
- Mast raising lines are measured from center of one pin the the center of the other pin (C-C).
- Lines of different lays and construction can not be used together.
- Unless otherwise noted, orientation of sockets will be parallel.
